

SUSHANT PARCHA

Tempe, AZ, USA | (602) 684-7721 | parchasushant532@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Computer Science undergraduate and Dean's List Scholar with hands-on experience in Python, Java, AWS, and automation systems. Proven track record in building full-stack applications, workflow automation, and cloud-integrated solutions. Experienced in leading development teams, implementing CI/CD pipelines, and deploying scalable systems.

EDUCATION

Arizona State University

Tempe, AZ

Bachelor of Science in Computer Science, Minor: Data Science

Aug 2023 – May 2027

- **Relevant Coursework:** Data Structures & Algorithms, Software Engineering, OOP, Computer Organization, Digital Design, Programming Languages, Microprocessors, Networks & Transmission, Database Management, Web Development

TECHNICAL SKILLS

- **Languages:** Python (NumPy, Pandas, OpenCV), Java (JavaFX), C++, SQL, JavaScript, Shell Scripting
- **Cloud & APIs:** AWS (IoT Core, Lambda, S3), YouTube Data API, OpenAI API, RESTful APIs, Web Scraping
- **ML & CV:** Machine Learning, Computer Vision, Image Recognition, Similarity Matching, TensorFlow/PyTorch
- **Tools & Automation:** n8n, Git, GitHub, H2 Database, MySQL, MongoDB, Raspberry Pi
- **Testing:** JUnit 5, Mockito, Unit Testing, Test-Driven Development

WORK EXPERIENCE

Arizona State University

Tempe, AZ

Technical Support Analyst Associate (College of Health Solutions)

Oct 2024 – Sep 2025

- Automated departmental inventory tracking and data workflows using custom shell scripts, reducing manual data entry by 60%
- Resolved hardware, software, and network issues for 500+ faculty and students, maintaining 95% first-contact resolution rate
- Documented technical incidents and created knowledge base articles to improve team efficiency and reduce ticket resolution time

Arizona State University

Tempe, AZ

C2 Camp Lead

Aug 2024

- Led 3-day engineering orientation camp for 50+ incoming students with technical workshops and team activities
- Coordinated with faculty and staff to deliver presentations on academic resources and engineering career paths

Cetpa Infotech Private Limited

Delhi, India

IoT Developer Intern

Jun 2020 – Jul 2020

- Built AWS IoT-based home security system using Raspberry Pi, Python, and ultrasonic sensors
- Deployed real-time monitoring solution with AWS IoT Core and Lambda for automated notifications

PROJECTS

AI Fashion Discovery Platform | Python, OpenCV, ML, TensorFlow, Web Scraping, REST APIs *Apr 2026 – Present*

- Developed AI-powered fashion discovery web platform using Machine Learning and real-time Computer Vision to identify clothing items from celebrity images
- Implemented image recognition and similarity matching algorithms to analyze uploaded images and detect fashion products with high accuracy
- Integrated web scraping and external APIs to collect product data and recommend visually similar clothing items from multiple shopping platforms
- Designed automated recommendation pipeline providing users with direct purchase links, improving shopping accessibility and user experience
- Built scalable backend architecture for real-time image processing, API handling, and efficient product search across online marketplaces

Automated YouTube Shorts System | n8n, OpenAI API, YouTube API, JavaScript, AWS S3 *Dec 2025 – Jan 2026*

- Built fully automated content pipeline using n8n workflow automation to generate and upload YouTube Shorts without manual intervention
- Integrated OpenAI API with custom prompts for AI-driven content ideation, generating optimized titles, descriptions, and hashtags
- Designed scalable cloud architecture using AWS S3 for video asset storage with automated retrieval and content mapping
- Developed custom JavaScript logic for API handling, request throttling, error recovery, and workflow orchestration

CSE360 Discussion Board Application | Java, JavaFX, H2 Database, JUnit, Git/GitHub

Jan 2025 – May 2025

- Led team of 4 through complete SDLC using Agile methodologies with daily stand-ups and Git branching strategy
- Implemented secure authentication with role-based access control, SHA-256 encryption, and session management
- Architected H2 SQL database with normalized schema and developed JavaFX GUI with real-time search functionality
- Created 50+ unit tests using JUnit 5 and Mockito achieving 85% code coverage across all core modules

Digital Home Security System | AWS IoT, Raspberry Pi, Python

Jul 2020

- Engineered sensor-driven cloud system using AWS IoT Core for real-time monitoring and alert logging
- Integrated ultrasonic sensors with Raspberry Pi and implemented automated cloud notifications using AWS Lambda

ACHIEVEMENTS

- **Dean's List Scholar:** Recognized for outstanding academic performance in Computer Science at Arizona State University
- **New American University Scholar:** Awarded merit-based scholarship for academic excellence at Arizona State University
